THE FALL ARREST TECHNICIAN

The Fall Arrest Technician course is aimed at working teams (such as the telecoms industry, the power distribution industry, construction and maintenance industry, events industry, plumbers, electricians, solar industry, agriculture industry, large factories and many more) that need to use a combination of fall arrest systems, install their own temporary systems and perform their own rescues if required.

After successful assessment has been completed candidates will be able to:

- Use a range of items of fall arrest equipment
- Tie 4 basic rope knots
- Install and use temporary fall arrest systems
- Inspect and assemble fall arrest equipment and systems
- Interpret and implement the fall protection plan
- Perform basic fall arrest rescues
- Briefly explain suspension trauma
- Use and explain the limitations of a limited range of fall arrest equipment
- Inspect and assemble fall arrest equipment
- Select suitable anchor points
- Use a double leg lanyard
- Use pre-installed vertical and horizontal lifelines

3 days of training and assessment

You will need a valid medical certificate of fitness and a certified copy of your identification document.

Contact us for more information and the training options available to suit your needs.
